

HUNGAROCOAT 2022

*XII. International Exhibition and Conference on Paint Industry
Budapest, 29-30 November, 2022.*

Dear Partners, dear exhibitors, conference participants and visitors,

After the recent epidemic years, in the hope that a peaceful, disease-free period will finally follow, we would like to draw your attention once again to the biennial Hungarian exhibition and conference on the paint industry.

The **Hungarian Chemical Society**, with the professional cooperation of **Festékipari Kutató Kft.**, is organizing its international event dealing with the paint industry and surface protection this year as well in Budapest, in the imposing central hall of ELTE, for the 12th time.

Theme of the exhibition HUNGAROCOAT 2022 is unchanged: it offers the opportunity of widespread introduction and meeting for producers and suppliers of raw materials, equipment and testing instruments for paint industry, moreover for institutions engaged in research and development, consultancy, technology planning and quality assurance.

The **HUNGAROCOAT 2022 Conference** will be held parallelly to the exhibition. According to our plan, the presentations and the exhibition will address the latest development results of industrial paints and surface protection, practical issues of paint application, new raw materials, progress in production processes, and new formulation solutions.

Participation in the **HUNGAROCOAT exhibition and the related conference** offers the following benefits:

- an effective way to clarify technical issues and problems,
- an excellent opportunity to establish new business relationships and renew old ones,
- and the opportunity to map relevant market trends.

More details about the product range and conference programme of **Hungarocoat 2022** will be available soon on our website (www.hungarocoat.hu) and in the leaflet issued for the event.

We recommend that you enter it in your calendar now the date of the HUNGAROCOAT 2022 event!

Yours faithfully,

***Beáta Androsits
Hungarian Chemical Society***

***Lívía Molnárné Nagy and János Bognár
Festékipari Kutató Kft.***
